## Fryers

Gas and electric models are available for the half single bath module or double bath, and in the integral double bath module. Deep-formed AISI 304 stainless steel baths, smooth edges that make cleaning easier. Patented system for smoke exhausting and ducting into an exchanger that is installed in the bath, increasing the machine performance. Wide cool area for oil filtering in specific small baths.

## Pasta Cooker

Gas and electric models with half single bath module (40 lt), integral double bath module (40+40 lt) and integral and a half triple bath module (40+40+40 lt). The frame is in Scotch Brite AISI 304 stainless steel, the bath in 316L AISI stainless steel with smooth edges. Built-in water charge/discharge system. Heating is performed by means of encapsulated heating elements (DESCO Patent) in the electric versions.
